Gender: Male

Marital Status: Married

BMI Category: Normal

Smoking Status: No Smoking

Region: Northwest

Medical History: High blood pressure

AI Summary

As a 30-year-old married male with 3 dependents, high blood pressure, and an income of ₹5 Lakh, it is recommended to have a health insurance cover of at least ₹7 Lakh to ₹10 Lakh. Consider buying a ₹5 Lakh base plan and a ₹5 Lakh to ₹10 Lakh Super Top-up. Remember to disclose your medical history truthfully and explore options to reduce your premium.

Recommended Cover: ₹7 Lakh to ₹10 Lakh base cover, considering Northwest region as Tier 2 or 3 city and income of ₹5 Lakh. Following the income rule, total cover should ideally be at least ₹5 Lakh (100% of income) but not lower than the city baseline. A cost-effective way is to buy a ₹5 Lakh base plan and a ₹5 Lakh to ₹10 Lakh Super Top-up

Premium Factors

- Age of 30
- Number of dependents (3)
- Income (₹5 Lakh)
- Genetical risk (0)
- Medical history (high blood pressure)

Reduce Premium

- Use a Super Top-up: Combine a small base plan with a large super top-up
- Buy multi-year policies: 2-year or 3-year payments offer 7% to 15% discounts
- Stay claim-free: Earn NCB discounts
- Join wellness programs: Track steps on insurer apps for renewal discounts
- Improve health: Losing weight or managing high blood pressure can lower future premiums

Buying Advice

- Calculate adequate Sum Insured based on city, income, and family size
- Compare 2-3 short-listed plans checking for: No room rent limit, no co-pay, and low PED waiting periods
- Fill out the proposal form with 100% truthful disclosure
- Undergo a tele-medical interview or physical medical test if requested by the underwriter
- Pay the initial premium online
